

2017 – 2018
Secondary Student Handbook

Secondary Student Handbook 2017-2018

Serving Area Public Schools

Non-Discrimination and Section 504

No student shall be discriminated against because of age, color, disability, parental status, marital status, race, national origin, religion, gender or veteran status. Parents who have temporary or permanent disability may request the district/center to provide appropriate accommodations necessary for them to participate in essential instructional activities of their students. Students who are at least eighteen (18) years of age may submit their own requests.

It is the policy of National Park Technology Center (NPTC) to provide a free and appropriate public education to each qualified student with a disability within its jurisdiction, regardless of the nature or severity of the disability. It is the intent of the district/center to ensure students who are disabled within the definition of Section 504 of the Rehabilitation Act of 1973 are identified, evaluated and provided with appropriate educational services.

Under Section 504, due process rights of qualified students with disabilities and their parents are guaranteed in National Park Technology Center. The National Park College (NPC) Dean of Students serves as the Coordinator of Section 504 and other equity issues for NPTC. The office of the Dean of Students is on the second floor of the Gerald Fisher Campus Center. The telephone number is (501) 760-4229.

National Park Technology Center

National Park Technology Center is a secondary area career and technical center that provides training to high school students. The following programs of study are offered:

Advertising and Graphic Design

Automotive Service Technology

Criminal Justice

Medical Professions

Machine Tool Technology (Metal Shop)

Mobile Applications Development

Pre-Engineering

Wood Technology (Cabinetmaking)

All instructors hold credentials in their respective areas of instruction and are experienced professionals in their fields.

ENROLLMENT INFORMATION

Eleventh and twelfth grade students are eligible to enroll in all training areas. Students may enroll in the center's programs by contacting their home school counselor or principal. All students, including returning students, must complete an enrollment application before being considered for admission in any of the training areas.

Priority in enrollment is given to students as follows:

1. returning, second year students (in the same program of study);
2. first year juniors;
3. first year seniors.

Enrollment is limited in each of the training areas. Due to space restrictions and safety concerns, students may be asked to choose an alternate training program or alternate time. In the event there are more applicants for a section than available seats additional enrollment criteria will be followed. Each program area has other specific guidelines that are used to determine enrollment. These guidelines are listed with the program descriptions. The final determination of enrollment in any of the programs will be at the discretion of the program instructor and the center director.

ID BADGES

All students enrolling in the secondary center programs will have a photo ID badge. Due to safety and security concerns all students are required to wear ID badges while on campus. There is no charge for the initial ID badge. Replacement badges will cost \$5 each and must be purchased through the Pinkerton Building office. A receipt will be provided along with instructions on how to obtain the replacement badge.

TRANSFERS

A student may transfer from one program to another with approval from the program instructor(s), center director and the home school counselor and principal. Transfers will be limited to one per student and will not be approved after the first week of instruction in the fall semester.

A student currently enrolled in another area center or off campus class may transfer to a NPTC program if the transfer is not due to disciplinary or academic reasons. If a transfer student was dropped because of failure to adhere to the attendance policy, he/she may be considered for enrollment at NPTC after consultation with the course instructor, the center director and the high school counselor.

CALENDAR AND CLASS PERIODS

Students should follow their home school calendar, including holidays and breaks unless otherwise indicated on

the NPTC calendar.

National Park Technology Center has three class periods per day. Times are listed below:

- 1. 8:00 A.M. - 9:20 A.M.**
- 2. 10:15 A.M. - 11:35 A.M.**
- 3. 12:35 P.M. - 1:55 P.M.**

ATTENDANCE POLICY

To maintain acceptable progress, regular and prompt attendance is expected. Students should make every effort to be in class on time and prepared to work. Absences and tardies are submitted daily by the program instructor to the center director's office and the home school.

National Park Technology Center follows the attendance policy of National Park College. The NPC attendance policy states that a student must be present 85% of the time in order to maintain satisfactory progress. Based on this policy, National Park Technology Center allows students a total of fourteen (14) absences each semester. NPTC does not recognize excused or unexcused absences. Home school closures do not count as student absences. Any absences over seven (7) days in a semester will result in the student losing the ability to be exempt from the final exam.

The student's parents/guardian and home school will receive a written notice from the center when a student reaches the seventh (7th) and (12th) absences of the semester. Parents are to contact the center director after the (7th) absence. A second parent contact to the director is required when a student reaches twelve (12) absences. Students will be dismissed from the center on the fifteenth (15th) absence of a semester.

The parent and/or the student may appeal the attendance dismissal to the center director within three (3) business days of the student's fifteenth (15th) absence. The appeal must be submitted to the center director in writing along with any documentation to be considered. All information will be reviewed by the director in making a decision to uphold or overturn the dismissal. Students who are dismissed due to attendance may not return to the center the following semester unless approved by the director.

Students who are more than twenty (20) minutes late to class or who leave class more than twenty (20) minutes early will be considered absent for that day. Students who attend classes at the center on a day when their home school is not in session may earn a day to replace an absence. Extenuating circumstances will be considered on an individual basis by the center director and the program instructor.

Policies for make-up assignments will be at the discretion of the individual program instructors. Instructors will provide students with a written policy for make-up assignments at the beginning of the school year.

TARDY POLICY

Students are expected to be in class on time and ready to work. The following tardy policy will be followed:

- 3 tardies – Verbal warning from teacher
- 5 tardies – Conference with director
- 7 tardies – No exemption from the final exam / home school contacted and tardy policy enforced

STANDARDS OF PROGRESS

The following grading system will be utilized to evaluate students at NPTC:

A	90-100%
B	80-89%
C	70-79%
D	60-69%
F	0-59%

Student records are maintained by the instructor and are supplied to the home school principal for the student's permanent record.

ON-LINE LEARNING

NPTC believes in the use of technology in the learning environment. All students will be required to use technology, on-line learning platforms and the internet during their courses at NPTC.

COMPUTER/INTERNET USE POLICY

Students will have access to computers and the internet to enhance their training experience. In addition to the computers in the secondary programs, students have access to the college's open computer labs. Responsible use of NPTC's technology is expected of all students. Students will adhere to National Park College's Open Computer Lab Rules and Student Acceptable Use Policies as stated on the college's website. Any violation of these policies by a secondary center student will result in dismissal from the center. View the full acceptable use policy at: np.edu/about/board-policies/8-500-computer-acceptable-use.aspx.

CELL PHONES, I-PODS AND OTHER ELECTRONIC DEVICES

Cell phones, i-Pods and other electronic devices can be disruptive to the learning process and therefore should not be used during class times unless specifically indicated by the classroom instructor.

Students who disrupt class with the use of cell phones, i-Pods or other electronic devices may have them confiscated. The device will not be returned to the student until a parent or guardian meets with the center director.

OUT OF CLASS/INDEPENDENT LEARNING

NPTC strives to provide a quality education to the students it serves. Within these efforts is the recognition that learning must occur beyond the classroom and outside the school day. Independent learning is defined as related work that is done outside of the normal classroom hours. Homework assignments will vary between programs.

STUDENT ORGANIZATIONS

Through career and technical student organizations, students are provided with opportunities for leadership and skills training, competition, networking with business and industry, and contact with other career and technical students across the state. Students participating in these organizations are responsible for all dues associated with membership in the organizations. The two primary student organizations on campus are SkillsUSA and HOSA. SkillsUSA seeks "to empower members to become world-class workers, leaders and responsible American citizens." HOSA seeks "to develop leadership and technical HOSA skill competencies through a program of motivation, awareness and recognition, which is an integral part of the Health Science Education instructional program."

NATIONAL TECHNICAL HONOR SOCIETY

NPTC students who exhibit exceptional performance will receive recognition as honor graduates through the National Technical Honor Society. To be considered for recognition in the NTHS a student must meet the following criteria:

1. Maintain a minimum grade average of 90% in the first three nine weeks grading periods;
2. Have no more than five (5) absences during the school year;
3. Have no disciplinary actions during the school year;
4. Be recommended by the program instructor.

ACCIDENTS

National Park Technology Center is not responsible for accidents or injuries that occur on campus or during school related activities. When an accident or injury of any kind occurs, the Health Services nurse and the center director should be notified immediately. Transportation for and costs of medical treatment are the responsibility of the student and/or student's parent/guardian. National Park Technology Center does not provide insurance coverage for students.

STUDENT PARKING AND TRAFFIC REGULATIONS

The speed limit on campus is five (5) m.p.h. The speed limit will be strictly enforced. NPTC students may park in the following areas: Ish Stivers Parking Lot, South Parking Lot, and the Gym Parking Lot. Students are prohibited from using the drive behind the Wood Technology and Engineering Buildings. These locations are labeled on the Campus Map at the end of this handbook. Loud music is prohibited and all vehicles driven to NPTC by students must have parking decals. The decals are available in the office in the Pinkerton Building and are no charge. If parking or traffic regulations are not followed, driving privileges can be suspended or removed.

Students with handicaps or injuries resulting in difficulty walking should meet with the center director regarding a pass for parking in handicapped spaces.

DRUG AND ALCOHOL AWARENESS

NPTC students should be aware of the extremely dangerous health risks associated with the use of drugs and alcohol. All students are strictly forbidden to possess, use and/or distribute drugs and alcohol on campus or as any part of activities sponsored by NPTC. NPC is a tobacco free campus. Students are prohibited from smoking or using smokeless tobacco while on campus. This policy includes the use of e-cigarettes.

Students found in violation of the NPTC drug and alcohol policy will be subject to immediate suspension and/or dismissal. Prosecution by local, state and federal authorities is possible. NPTC adheres to Public Law 101-226 as mandated by the U.S. Department of Education governing drug and alcohol possession and distribution.

LEAVING CLASS EARLY

Students may not leave center classes early without permission. Students who need to leave campus early must sign out in the Pinkerton Building office. Failure to sign out prior to leaving campus will result in the student being counted absent for the day and may result in suspension or dismissal from the center. Students should bring documentation from the home school and/or parent when they check out.

STANDARDS OF CONDUCT

Arkansas secondary area centers have the privilege and responsibility of providing high school students with the training and skills needed for further education or employment and have a genuine concern for the dignity of all students enrolled. Acceptable conduct is expected during center activities on and off campus.

Students should:

1. Be responsible for information made available through notices, announcements, general brochures, catalogs, or oral information provided by the instructor(s) or administration;
2. Help maintain a clean and orderly training environment;
3. Dress appropriately for their field of training;
4. Observe all parking and traffic regulations;
5. Refrain from the use cell phones or other electronic devices unless permitted by the instructor;
6. Conduct business before or after class. Students are not to have visitors or receive phone calls unless it is an emergency;
7. Follow all safety rules and guidelines as indicated in classroom and lab areas;
8. Complete all out of class/independent learning assignments;
9. Makeup all assignments missed due to absences or tardies.

GROUNDS FOR SUSPENSION/DISMISSAL

For the benefit of all, NPTC policies must be observed. The safety, rights and feelings of others must be respected. A student may be suspended or dismissed for conduct or personal habits that are not in the best interest of that student, fellow students or the technology center. Continued enrollment in the center after a suspension or dismissal for either academic or discipline violations will be handled on an individual basis with a written agreement among the student, parent(s), NPTC staff and the center director.

NPTC will follow the home school's discipline policy in regard to rules infractions unless stated otherwise. Students suspended from their home school are considered to be suspended from classes at NPTC.

Grounds for dismissal include but are not limited to the following:

1. Negligent damage, destruction, loss, or disposal of NPTC property. Students will be charged for the full damage or loss and are subject to prosecution under state laws;
2. Stealing, gambling, verbal or physical abuse, fighting, possession of firearms or other dangerous weapons;
3. Failure to observe parking and driving regulations;
4. Violating drug and alcohol policy;
5. Academic cheating;
6. Possession of pornographic material or accessing it;
7. Being formally charged with a felony or misdemeanor involving the center, staff, or student property;
8. Terroristic threats including the threat of physical violence on staff or students;
9. Threatening behavior such as bullying;
10. Use of vulgar language and/or profanity including obscene gestures;
11. Sexual harassment;
12. Violation of the computer Acceptable Use Policies;
13. Continuous interruption, disturbance, or other misconduct that interferes with normal center operations or hinders the learning process;
14. Failure to obey instructor's or administrator's directions or failure to comply with any or all NPTC policies.

INCLEMENT WEATHER

NPTC follows the directives of the NPC administration. In the event that weather is so severe that NPC administration feels life and property may be in danger, classes may be canceled until conditions improve. School closings will be broadcast on local radio and television stations.

NPC is equipped with an emergency notification system. Students who wish to sign up for the emergency notification system may do so by following the directions at <https://np.bbcpportal.com>

If the student's home school is closed due to inclement weather, the student will be excused from attending classes at the center. Students who attend center classes when their respective home school is closed may earn a day back on their total number of absences.

STUDENT CENTER

The Student Center is used for student group meetings and as place for students to enjoy a snack or lunch. Snack foods may be purchased from vending machines in the center before or after classes. There are no breaks for technology center students during the class periods.

In the event money is lost in a vending machine, students should report the loss to the office in the Pinkerton Building. At no time should students shake, hit or otherwise attempt to obtain merchandise from the vending machines. When such conduct occurs it will be treated seriously.

Students who go to the Student Center are expected to respect the fact that classes and other activities are conducted adjacent to the Student Center. Cups, wrappers, and other waste materials should be placed in the trash containers provided. Recycling containers are available for plastic, aluminum and paper in front of the student center.

VISITORS

Parents, school officials and interested patrons are welcome to visit classroom and shop areas but only after arrangements are made through contacting the center director. Failure to schedule an appointment may result in individuals being asked to leave campus. All visitors must sign in at the Pinkerton Building and wear a visitor's ID badge while on campus. Visitors must sign out when leaving campus.

SCHOLARSHIPS

NPC provides the National Park Promise Scholarship to students completing a two year program of study at NPTC. The National Park Promise covers 100% of the cost of tuition and fees after other student financial aid has been applied. Students should apply for the scholarship during the spring semester before graduation through the

NPC Enrollment Services Office. NPTC students may also qualify for other NPC scholarships.

COLLEGE CREDIT

Most of the secondary center programs offer college level credit upon completion. The number of credit hours may vary within each program. Students should check with their instructor for the number of credit hours available and any requirements that must be met to obtain these hours. Students who wish to enroll in center classes for college credit must meet the requisite test score on the ACT or ACCUPLACER tests. Scores are to be submitted along with the Concurrent Enrollment Form to the Concurrent Credit Coordinator prior to the first day of the fall semester.

STUDENT EXPENSES

Each program at NPTC has costs associated with materials, supplies, uniforms, certifications, etc. Costs to students vary from program to program. Instructors will provide students with a list of expenses at the beginning of the school year.

CERTIFICATIONS

Some of the programs at NPTC have national industry related certification exams associated with them. Students are encouraged to take advantage of these certifications. To further encourage students, NPTC will reimburse the student for the cost of taking a certification exam if proof of payment for the exam (cancelled check or official receipt) and proof of a passing score (actual certification card or certificate) is provided.

OTHER

National Park Technology Center is sponsored by National Park College. As such, students fall under the rules and regulations that govern the college. Items that are not addressed in this student handbook will be referred to the college catalog and/or policies and procedures manual for decision.

NPTC PROGRAMS

ADVERTISING AND GRAPHIC DESIGN	PG. 10
AUTOMOTIVE SERVICE TECHNOLOGY	PG. 11
CRIMINAL JUSTICE	PG. 12
MACHINE TOOL TECHNOLOGY (METAL SHOP)	PG. 13
MEDICAL PROFESSIONS	PG. 14
MOBILE APPLICATIONS DEVELOPMENT	PG. 15
PRE-ENGINEERING	PG. 16
WOOD TECHNOLOGY (CABINETMAKING)	PG. 17

ADVERTISING AND GRAPHIC DESIGN

CLASS LIMIT: 25 STUDENTS PER SECTION

Graphic designers combine art and technology to communicate ideas through images and the layout of websites and printed pages. Graphic designers create visual concepts, by hand or using computer software, to develop the overall layout and production design for advertisements, brochures, magazines, and other digital media.

The mission of the Advertising and Graphic Design program is to guide students in an exploration of the fields of advertising and graphic design. Students will learn the steps followed in the design process allowing them to develop a solution to a design problem. Students will learn to effectively communicate ideas and information to business and consumer audiences through various forms of graphic media including traditional and new media.

Students will do well in Advertising and Graphic Design if they are creative and have strong communication skills. Time management skills and self-discipline are necessary to meet project deadlines. Students must have basic computer skills, an ability to read and follow written instructions, and the ability to work independently.

PROGRAM CONTENT:

FUNDAMENTALS OF ADVERTISING AND GRAPHIC DESIGN

First year students will learn to apply artistic techniques to present information via illustrations and other forms of printed media. Topics include: graphic design and the advertising industry, elements and principals of design, the design process, color theory, illustration, typography, design skills, computer skills and career development.

INTERMEDIATE ADVERTISING AND GRAPHIC DESIGN

Instruction for second year students emphasizes the integration of computer skills and knowledge of software used in the design industry. Topics include: advanced design skills, digital photography, portfolio building, web design, animation, and career development.

ADVANCED ADVERTISING AND GRAPHIC DESIGN

This takes the best, most important and relevant components of Advertising and Graphic Design Fundamental and Intermediate courses and expands them.

ADVERTISING AND GRAPHIC DESIGN LAB

This production-based lab is designed to allow students time for the development of skills and knowledge needed to execute a comprehensive ad design product.

Throughout the Advertising and Graphic Design program computer skills will be developed using industry standard software to create design projects. Students work in Macintosh computer labs using Adobe CS4 (Photoshop, Illustrator, InDesign). Web development and animation may be included for advanced students.

ENROLLMENT CRITERIA

All programs in the technical center have three class periods available for enrollment. In the event there are more applicants for a section than seats available, students will be asked to choose an alternate period. If the section(s) are still over enrollment capacity, the following additional criteria will be used to determine acceptance into the program:

1. Successful completion (C or better) of Business Applications, Desktop Publishing and/or EAST;
2. Successful completion of other approved computer related or art classes;
3. Minimum GPA of 2.0;
4. Student interview.

Final determination will be at the discretion of the instructor and the center director.

AUTOMOTIVE SERVICE TECHNOLOGY

CLASS LIMIT: 15 STUDENTS PER SECTION

It is the mission of high school Automotive Service Technology at National Park Technology Center to instruct students to be competitive in the work force so they can succeed in the 21st century.

The course is certified by the National Automotive Technicians Education Foundation (NATEF), and introduces the student to the fundamentals of repair, tune-up, and maintenance of today's automobiles. Upon completion of the course, a student may work as a lube tech in an independent automotive shop, a dealership, or may enter the post-secondary course for further training.

PROGRAM CONTENT:

BRAKES/MANUAL DRIVE TRAIN

Students learn to diagnose and repair brakes. Drum and disc brakes, and hydraulic systems are included.

ENGINE PERFORMANCE/ENGINE REPAIR

Students are trained to diagnose and repair automobile engines.

ELECTRICAL SYSTEMS

Students are prepared to diagnose and repair electrical/electronic systems.

SUSPENSION AND STEERING/AUTOMATIC TRANSMISSION SYSTEMS

Students are taught to diagnose and repair suspension and steering systems. They are also exposed to automatic transmission operation, servicing and repair.

ENROLLMENT CRITERIA

All programs in the technical center have three class periods available for enrollment. In the event there are more applicants for a section than seats available, students will be asked to choose an alternate period. If the section(s) are still over enrollment capacity, the following additional criteria will be used to determine acceptance into the program:

1. Minimum math level of tenth grade (Algebra and Geometry);
2. Minimum sixth grade reading level;
3. Minimum 2.0 GPA;
4. Student interview.

Final determination will be at the discretion of the instructor and the center director.

CRIMINAL JUSTICE

Class Limit: 25 students per section

The mission of the Law Enforcement program is to introduce students to occupations in law enforcement and in the criminal justice system of the United States and the State of Arkansas. The program assists students in discovering how the law affects their lives and in making connections between the development of laws and societal and individual values. Students will learn how to use community resources such as local police, the local bar association and other legal and public safety agencies.

An optional certification in Police Radio Dispatch Services is available to interested students. Payment of the fee and completion of the material does not guarantee certification.

Criminal Justice student are held to a higher standard of conduct. Students who are involved in illegal activities on or off campus, are arrested, or are charged with criminal offenses may be removed from the program.

PROGRAM CONTENT:

INTRODUCTION TO CRIMINAL JUSTICE

This introduces students to the Criminal Justice system and provides the background and base of knowledge needed to begin exploring careers available in law enforcement.

FOUNDATIONS OF LAW ENFORCEMENT

Students build on the knowledge gained in the Introduction course and gain a deeper understanding of the law and the procedures required to enforce it.

CRIME SCENE INVESTIGATION

This includes an overview of the basics of crime scene investigation. Students gain an understanding of the skills necessary to properly recognize, document, collect, process, and preserve evidence.

CRIMINAL LAW

Students receive instruction in how to perform the duties of police and public security officers. It includes witness interviewing, evidence collection and management, and basic crime prevention methods.

ENROLLMENT CRITERIA

All programs in the technical center have three class periods available for enrollment. In the event there are more applicants for a section than seats available, students will be asked to choose an alternate period. If the section(s) are still over enrollment capacity, the following additional criteria will be used to determine acceptance into the program:

1. Minimum sixth grade reading level;
2. Minimum sixth grade math level;
3. Minimum 2.0 GPA;
4. Student interview.

Final determination will be at the discretion of the instructor and the center director.

MACHINE TOOL TECHNOLOGY (METAL SHOP)

CLASS LIMIT: 15 STUDENTS PER SECTION

The mission of the Machine Tool Technology program is to introduce students to the field of precision machining. This program prepares students to shape parts on machines such as lathes, grinders, drill presses and mills. Students will receive training that can lead to employment as machinists, tool and die makers, CNC operators, machine operators, production planners and production control schedulers.

PROGRAM CONTENT:

MACHINE TOOL I

Students receive instruction in Industrial Safety and Environment Protection, Job Planning and Management, General Maintenance, Inspection and Quality Assurance, Job Execution, and Career Management and Employment Relations.

MACHINE TOOL II

Students gain knowledge in Metals, Layout, Machine Operations, and Computer Numerical Control.

MACHINE TOOL LAB

Shop experience accompanies the instruction and knowledge received in both Machine Tool I and II.

ENROLLMENT CRITERIA

All programs in the technical center have three class periods available for enrollment. In the event there are more applicants for a section than seats available, students will be asked to choose an alternate period. If the section(s) are still over enrollment capacity, the following additional criteria will be used to determine acceptance into the program:

1. Minimum sixth grade reading level;
2. Minimum sixth grade math level;
3. Minimum 2.0 GPA;
4. Successful completion (C or above) of one or more credits in an approved computer course;
5. Ability to lift objects up to 50 pounds;
6. Student interview.

Final determination will be at the discretion of the instructor and the center director.

MEDICAL PROFESSIONS

CLASS LIMIT: 30 STUDENTS PER SECTION

The mission of this program is to give students a broad understanding and occupational awareness of professions within the medical field. Instruction includes theory and laboratory activities in medical terminology, health and disease, medical procedures, medical professions, and other health related courses. Medical specialization is a component of the Level II program. Twenty (20) community service hours are expected per school year. Community service activities may be completed through the home school, community organizations, and/or NPTC.

Students must submit to random drug screenings at their expense, purchase uniforms and non-canvas/non-mesh white tennis shoes, have transportation to and from job shadowing/internship locations, provide proof of TB Skin Test, Hepatitis B vaccination (3), MMR (at least one) and Influenza vaccination before the end of the first quarter of the fall semester. To be eligible to participate in clinical internships students must maintain a "C" average in each fall nine week grading period, and may not exceed five (5) absences per semester during Level I, six (6) absences in the fall semester of Level II and four (4) absences in the third quarter.

PROGRAM CONTENT:

INTRODUCTION TO MEDICAL PROFESSIONS

This course provides a general overview of the many health-related occupations and the special concerns of the health care worker.

MEDICAL PROCEDURES

Students develop specific and general skills needed by the health science professional.

MEDICAL TERMINOLOGY

Students in this course are assisted in developing the language used for communication in the healthcare professions.

HUMAN ANATOMY AND PHYSIOLOGY

This course is focused on the anatomical and physiological systems of the body as well as the diseases of those systems.

MEDICAL PROCEDURES EXPANDED

Specific skills needed in the different areas of healthcare are expanded in this course.

ENROLLMENT CRITERIA

All programs in the technical center have three class periods available for enrollment. In the event there are more applicants for a section than seats available, students will be asked to choose an alternate period. If the section(s) are still over enrollment capacity, the following additional criteria will be used to determine acceptance into the program:

1. Minimum sixth grade reading level;
2. Minimum sixth grade math level;
3. Minimum 2.0 GPA;
4. Student interview.

Final determination will be at the discretion of the instructor and the center director.

MOBILE APPLICATIONS DEVELOPMENT

CLASS LIMIT: 20 STUDENTS PER SECTION

The mission of the Mobile Applications Development (MAD) program is to involve students in the design, development, and use of mobile device applications. The course uses Android and/or iOS platforms along with HTML, Java and Swift.

PROGRAM CONTENT:

MOBILE APPLICATIONS DEVELOPMENT I

Students are introduced to the fundamental elements of developing mobile applications in the Android platform in a full text coding environment using HTML and Java.

MOBILE APPLICATIONS DEVELOPMENT II

This course focuses on developing applications for the iOS platform in a full text coding environment using Swift.

MOBILE APPLICATIONS DEVELOPMENT III

Students in this course take the knowledge learned in MAD I and II to develop working applications for mobile devices.

MOBILE APPLICATIONS DEVELOPMENT IV

This is where students are able to complete a working application and share it with others.

MOBILE APPLICATIONS DEVELOPMENT LABS

Each MAD course includes lab time in order for students to take the knowledge learned about developing apps and apply it.

ENROLLMENT CRITERIA

All programs in the technical center have three class periods available for enrollment. In the event there are more applicants for a section than seats available, students will be asked to choose an alternate period. If the section(s) are still over enrollment capacity, the following additional criteria will be used to determine acceptance into the program:

1. Minimum sixth grade reading level;
2. Minimum sixth grade math level;
3. Minimum 2.0 GPA;
4. Successful completion (C or above) of one or more credits in an approved computer course;
5. Student interview.

Final determination will be at the discretion of the instructor and the center director.

PRE-ENGINEERING PLTW

CLASS LIMIT: 20 STUDENTS PER SECTION

The Pre-Engineering program is offered in association with Project Lead the Way (PLTW) which is designed to be thought provoking, develop critical thinking and leadership skills, and to prepare students to compete in a global economy.

The mission of the Pre-Engineering program is to guide students in an exploration of the opportunities within the engineering profession and to solve engineering problems. Students will go beyond engineering theory and make application to real world challenges. Students will learn to explain their processes and present their projects to an outside review panel.

Students will develop time management skills and self-discipline in order to meet project deadlines. Students must have basic computer skills, an ability to read and follow written instructions, and the ability to work independently or in groups.

PROGRAM CONTENT:

INTRODUCTION TO ENGINEERING DESIGN

Students develop problem-solving skills through creating a 3D model or solid rendering of an object. State-of-the-art computer hardware and software are used to focus on the application of visualization processes. Emphasis is placed on the design development process, use of various design applications, and career opportunities.

PRINCIPLES OF ENGINEERING

This broad based survey course helps students understand the field of engineering and the career possibilities that exist. Students develop engineering problem-solving skills that are needed in engineering careers. The course is designed to help students decide if a career in engineering or engineering technology is right for them.

CIVIL ENGINEERING AND ARCHITECTURE

Math, science, and standard engineering practices are used in this course in the designing of both residential and commercial projects. Students learn important aspects of building, site design and development. Work is documented using 3D architecture design software.

ENGINEERING DESIGN AND DEVELOPMENT

Students work in teams to design and construct a solution to an engineering problem through the application of principles developed in the preceding courses. Each problem will involve a wide range of engineering applications and students will maintain a portfolio of their work. Each team delivers progress reports and makes a final presentation of their project to an outside review panel.

ENROLLMENT CRITERIA

All programs in the technical center have three class periods available for enrollment. In the event there are more applicants for a section than seats available, students will be asked to choose an alternate period. If the section(s) are still over enrollment capacity, the following additional criteria will be used to determine acceptance into the program:

1. Minimum sixth grade reading level;
2. Minimum sixth grade math level;
3. Minimum 2.0 GPA;
4. Successful completion (C or above) of one or more credits in an approved computer course;
5. Student interview.

Final determination will be at the discretion of the instructor and the center director.

WOOD TECHNOLOGY (CABINETMAKING)

CLASS LIMIT: 15 STUDENTS PER SECTION

Wood Technology focuses on the safe use of machines and tools used to fashion wood into usable objects. Students receive industry level training and credentials recognized by OSHA and NCCER. Theory and fundamentals of woodworking are incorporated into the course that has as its purpose teaching students how to safely and accurately use woodworking machines and tools. Students who have little or no knowledge of woodworking are taught how to plan projects and are taught the shop skills needed to complete the projects.

PROGRAM CONTENT:

Wood Tech I

Students in this course complete OSHA 10 Hour Construction Safety training as well as the NCCER Core Curriculum. Safely operating and using tools and equipment is emphasized along with blueprint reading, measurement, general finishing, and using mechanical fasteners.

WOOD TECH II

The focus in this course is on using the skills learned in Wood Tech I through designing furniture and cabinets, CNC programming, construction of designs, and developing advanced woodworking techniques.

ENROLLMENT CRITERIA

All programs in the technical center have three class periods available for enrollment. In the event there are more applicants for a section than seats available, students will be asked to choose an alternate period. If the section(s) are still over enrollment capacity, the following additional criteria will be used to determine acceptance into the program:

1. Minimum sixth grade reading level;
2. Minimum sixth grade math level;
3. Minimum 2.0 GPA;
4. Successful completion (C or above) of one or more credits in approved Mathematics, Science and/or Art classes;
5. Student interview.

Final determination will be at the discretion of the instructor and the center director.

PARENT/STUDENT HANDBOOK VERIFICATION

This form must be completed and signed by the student and the student's parent/guardian and returned to the student's NPTC instructor. This form must be completed before the student will be officially admitted to NPTC. The NPTC Handbook can be accessed at <https://np.edu/academics/nptc/>
